The Vortex Water Revitalizer Catalog

Apartment Models/

Getting Revitalized Water
in your apartment or rented
home has never been so easy!

The Kitchen and Shower Vortex Water Revitalizers were designed for fast and easy installation, making them perfect for apartments as well as for travel. Their compact, sleek designs allow you to experience the benefits of Revitalized Water in your kitchen or shower. The convenience of having a water treatment system in your home that does not require any maintenance, replacement parts or a permanent installation is like no other.

For Travel...

Not only are they perfect for your apartment or rented home, but they are also great for travel. They take up little room in your luggage and fit universal standards. With a simple installation you can enjoy the same quality of water you experience at home while travelling.

In the Kitchen...

The Kitchen Vortex Water Revitalizer attaches easily to any kitchen tap. In an instant your drinking water will be transformed, and you will experience the joys of cooking and cleaning with Revitalized Water.

For pullout kitchen faucets there is a Pullout Faucet Adapter available.

In the Shower...

The Shower of Life Vortex Water Revitalizer is installed in your shower between the shower outlet and your existing showerhead. Installation is simple and your skin and hair will benefit from showering in Revitalized Water.

I installed my Kitchen Vortex Water Revitalizer this morning. I LOVE IT! The water is light, soft and full of oxygen bubbles. It even tastes better than bottled, distilled and carbon filtered water. The taste is crisp and filling...It was a no-brainer for me. This Vortex Water Revitalizer is certainly the best money I have ever spent.

Pullout Faucet Adapter

Product# 9004

Price: \$20 USD

Material: SS316 Stainless Steel

Whole House Models/

With the installation of a Whole House Vortex Water Revitalizer, you will experience dramatic changes in all of your water related tasks and activities.

The Standard Vortex Water Revitalizer was the original design produced by World Living Water Systems Ltd. This amazing device has the power to transform your water in such a way that the benefits will positively affect all aspects of your lifestyle. The double spiral flow form within the deceptively simple looking pipe, creates healthy, living water, full of vitality from your ordinary tap water.

The River of Life...

The River of Life Vortex Water Revitalizer is the newest innovation from World Living Water Systems Ltd. Not only does it have the internal double spiral flow form, but it also has a wavy design in the pipe itself. The water passes through the double spiral flow form while simultaneously moving through the long and short turns of the pipe itself. This allows for an

even more realistic simulation of water's movement in nature. You will experience enhanced benefits and optimal results with the River of Life Vortex Water Revitalizer.

Whether you use the Standard Vortex Water Revitalizer or the River of Life Vortex Water Revitalizer, you will experience positive changes in your cooking, drinking, showering, cleaning, and gardening, all while benefiting the environment and lowering your carbon footprint!

Installation is on your main water line, before the water splits into hot and cold, and after any existing whole house filter systems.

The pipes that World Living Water Systems manufacture are unique in so many ways. They require only a one time installation, have no moving parts, never require replacement or refills and cause an instantaneous transformation of the water.

Models For Filters/

The water treated by filters, reverse osmosis systems, water softeners and distillers will be significantly improved with the use of a Vortex Water Revitalizer for Filters.

When tap water is treated by filters, reverse osmosis systems or distillers, the water is cleaned but is lacking in vitality. Most people note that their water is left tasting "flat" after being treated with other water treatment systems due to the processes the water is put through.

Most water treatment systems put water through unnatural processes which destructure the water and strip it of many natural properties. The River of Life Vortex Water Revitalizer for Filters and the Standard Filter Vortex Water Revitalizer were specially designed for customers with existing water treatment systems.

With the Vortex Water Revitalizers for Filters, your water will be Revitalized, brought back to its natural state and re-instilled with its natural properties.

Installation

We recommend always installing the Vortex Water Revitalizer AFTER any other type of water treatment system in order to receive optimal results.

NOTE: If you have a whole house filter or water treatment system, you will need to install a Whole House Vortex Water Revitalizer after it.

The taste of the water from my reverse osmosis system has improved dramatically...I have also noticed that the benefits of soft water seems to have been "amplified" in that cleaning has become even easier, skin is even softer and my soft water is now luxurious soft water.

Commercial Models/

The Vortex Water Revitalizer will reduce commercial industries' carbon footprint while also saving in energy, lowering water consumption and improving water quality.

The Commercial Vortex Water Revitalizers were created with sustainability in mind. Commercial applications of the Vortex Water Revitalizer will help to reduce the strain and damage caused to rivers, lakes and oceans; as well as their surrounding ecosystems. They also allow for energy savings in cooling and refrigeration applications and a reduction in water consumption for agriculture and irrigation applications.

Stainless Steel

The stainless steel Commercial Vortex Water Revitalizers were designed for food related industries. Areas of use include, but are not limited to: water bottling facilities, food packaging and processing, dairy farms, meat and fish processing facilities and restaurants.

Copper

The copper Commercial Vortex Water Revitalizers can be used in a number of industries, including but not limited to: agriculture and farming, municipal water treatment facilities, hospitals, sewage and wastewater treatment, and manufacturing.

The Vortex Water Revitalizer is highly efficient in the treatment of wastewater.

The stalks of the plants are thicker and stronger, meaning we can use two less flowers in each bunch that we sell, that equates to \$2.00 per bunch. Since we sell many thousands of bunches per year, our profit margins have increased and our flowers are healthier.
