

Distributor Wholesale Price Structure

Wholesale discounts are achieved based on the accumulated purchased a distributor has made:

- For accumulated purchases between \$1000 and \$2000 a distributor will receive 20% off the retail prices.
- For accumulated purchases between \$2000 and \$3000 a distributor will receive 30% off the retail prices.
- For accumulated purchases over \$3000 a distributor will receive 40% off the retail prices, and all subsequent orders.

Please Note: In order to receive a wholesale discount your order, or the accumulated total of your orders, must fall in the applicable price range AFTER the discount and BEFORE taxes and/or Shipping & Handling. For example, in order to receive a 20% discount, your order or accumulated orders must be over \$1000 after the 20% discount has been applied and before taxes or Shipping & Handling.

- To receive a 50% wholesale discount, a distributor must place an order of minimum \$20,000 AFTER the 50% discount. Accumulated purchases are not applied to the 50% discount category.

The following tables list a break down of costs and profits made on the full Vortex Water Revitalizer product line based on the wholesale discounts offered by World Living Water Systems:

Apartment Models

| Product Name | Product Number | Retail Price | 20% Discount | Your Profit | 30% Discount | Your Profit | 40% Discount | Your Profit | 50% Discount | Your Profit |
